

Bio-based, Carbon Captured Bags, Sacks, Liners & Films

Made from Sugarcane. Sweet for the planet.

Removes Carbon from Atmosphere

Carbon footprint is minus 0.2kg per kg from cradle to gate. Therefore removing 200kg of CO₂ per tonne of material produced.

Sustainable and Renewable

Manufactured from ethanol produced from sugarcane.

100% Recyclable

Can be recycled with fossil-based plastics.

Multilayer

3 layer co-extrusion reduces thickness and increases strength. Uses less material.

Certified by The Carbon Trust and TÜV.

The Carbon Trust certifies our products carbon footprint and TÜV certifies the bio-Based content.
